

CV Linda Pagli

Linda Pagli received the Laurea degree in information sciences from the University of Pisa, Italy, in 1973. She is currently a professor of computer science at the University of Pisa.

After her degree she became a researcher in the Department of Informatics of the University of Pisa, starting her research activity in data structures, and then in VLSI computation. In 1987 she was appointed a professor of computer science at the University of Salerno, Italy, to return to Pisa three years later. She has been a visiting professor at Carleton University in Ottawa, at University of Botswana and at Columbia University in New York. Her current research interests are in the bases of computation, and in design and analysis of sequential and distributed algorithms.

Professor Pagli has pursued intense activities in higher education in favor of developing countries. She is a member of ACM.
